Photo request for marketing

We are improving how Techzy appears on Google, Google Maps, Facebook and AI assistants (ChatGPT, Gemini, Perplexity). Real photos of our two shops matter most: they appear in Google Maps, our Google Business Profile, and link previews when people share our website.

Please send the photos below, plus the social media links on page 2.

1. Photos needed

#	Photo	How many	What to capture
1	**Yangon shop: storefront**	1 to 2	Full front of the shop with the Techzy sign clearly readable. Daylight, straight on.
2	**Yangon shop: interior**	2 to 3	The counter and the laptop display. Tidy and well lit.
3	**Mandalay shop: storefront**	1 to 2	Same as Yangon: sign readable, daylight, straight on.
4	**Mandalay shop: interior**	2 to 3	Same as Yangon: counter and display, tidy and well lit.
5	**Sealed laptop box**	1 to 3	A factory-sealed laptop box, or a customer opening one. Shows our "brand new, factory sealed" promise.
6	**Team photo (optional)**	1	Staff in the shop, for the About and Careers pages. Everyone pictured must agree.
7	**Logo master file (only if needed)**	1	Only if the logo on techzymm.com is not the official version: SVG or AI/EPS, plus a 1024 × 1024 px PNG.

2. Photo requirements

Requirement	Detail
Orientation	Landscape (wider than tall).
Size	At least 1600 × 1200 pixels. Larger is better.
Format	JPG, original file straight from the camera or phone.
Colour	Colour is fine. The website converts photos to black and white itself.
Do not send	Screenshots, or copies sent through Viber, WhatsApp or Messenger (they shrink the photo).
People	No customers' faces close up unless they agree. Staff must agree to appear.
Rights	Only photos Techzy owns or has permission to use. No stock photos.
File names	Shop and subject, for example yangon-storefront-1.jpg, mandalay-interior-2.jpg.

3. Social media links

These link the website to our official profiles so Google and AI tools know they belong together. Please send the full web address of each profile we have.

Profile	Link
Facebook page	
Instagram	
TikTok	
YouTube	
Viber community or channel	
Google Business Profile (Yangon)	
Google Business Profile (Mandalay)	
Other	

Leave a row empty if we do not have that profile.

4. How to send

Upload everything to one shared folder (Google Drive or similar) and send the folder link to the person who shared this request. Please do not send photos one by one in chat apps.

- Photos can arrive in batches; shop photos (items 1 to 4) are the priority.
- Questions about a photo? Send one sample first and we will confirm it works.
